A guide to your new product.

Installing wedges to LAAKSO rocking lounger

Step 1

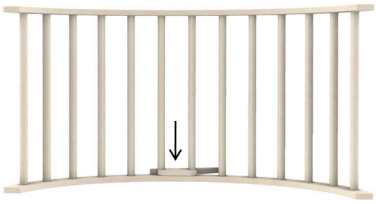

Depending on the desired angle, place the wedges between the selected rungs so that the longer side of the wedge points in the direction where your back will be.

Between rungs 5 & 6 = sitting upright
Between rungs 6 & 7 = leaning back
Between rungs 7 & 8 = laying down

Step 2

Place the first wedge parallel between the chosen rungs, with the shorter end of the wedge facing the closer arch. Rotate it until it aligns with the arches and attaches to the rungs.

Step 3

Gently slide the first wedge to the end of the rungs, positioning it against the arch. Then, repeat steps 2 and 3 with the second wedge, placing it against the opposite arch at the other end of the same rungs.

Step 4

Make sure you have installed the wedges between the correct rungs, and ensure that the longer ends of both wedges are pointing towards the back of the rocking lounger.

You have now successfully installed the wedges for LAAKSO rocking lounger.
