TUOHI slide ramp

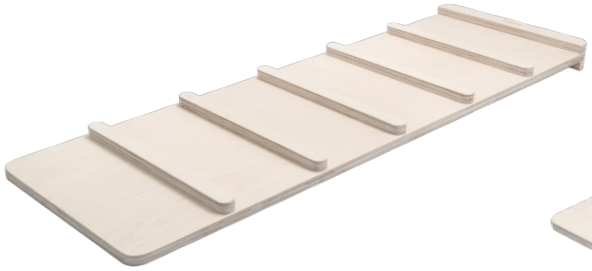

FITWOOD®
FOR KIDS

TUOHI slide ramp

TUOHI slide ramp is a fun and versatile product that can be combined with our GALDHØP climbing arch and with all the different wall bars available in our product range. The slide ramp has two sides, one for sliding and the other for climbing. It enables the familiar climbing arch and wall bars to take on new dimensions and thus takes playtime to a whole new level. TUOHI is easy to use and requires no fixed installation. The slide /climbing ramp incline can be changed in no time by placing it on the desired bar.

The slide ramp is designed to improve children's coordination and motor skills while encouraging them to engage in free and creative play. Only the imagination is the limit to what this slide ramp can turn into – small birdies can climb down the ladder to start their days adventures, or rally drivers can race to see whose car is fastest down the hill. Playing together improves children's social skills, and our versatile slide ramp ensures there will be no dull moments.
